Temp-Tec Reader

Are you using (or thinking of using) iButton Thermochron™ data loggers for cold chain monitoring?

Never before has it been so quick and easy to receive chilled and frozen goods that are monitored by Thermochron data loggers.

The **Temp-Tec Reader** is a hand held data gatherer that can download files from the Thermochron data loggers just by touching them. The Temp-Tec Reader can hold files from 370 Thermochron data loggers before off-loading the files to the PC. The receiver is able to see immediately if any temperature problem has occurred during transport without having to download to a computer first.

Temp-Tec Reader fits in a pocket, is **sturdy** and **watertight** and very easy to use.

Size: 65 x 31 x 106mm **Weight**: 115 g **Battery:** ½AA 3.6V **Casing**: Poly carbonate watertight IP68 *Features:* **Fast download**, about 2 seconds. *Acknowledgements:* **Flashing yellow light** during download. **Green light**: Safe, readings within limits **Red light**: Alarms triggered **No light**: Download failed	*Details on Display*: **Safe** within the set limits **Colder** than a set degree **Warmer** than a set degree **"Try again"** if download fails **Date and time** **Number** of files downloaded (eg. **234 of 370**) **Software complies with FDA CFR21 part 11**

Loggers can be read safely many times, at loading, transhipments, unloading and arrival at the store, as Temp-Tec Reader cannot interfere with the logging or the files.

When off-loading files to the PC, the off-load is fast and secure via USB connection.
The software sorts the files by date and by the details that were inserted in the files by the shippers: Name, product codes, destination. Any alarm situation is easily seen.
Temp-Tec Reader may be programmed to disregard a set period of time when the temperature may get too high, for instance during unloading, without announcing an alarm situation.
Files can be imported into T-TEC graphic software for graphs, statistics etc. or spreadsheets.

Thermochron is a trade mark of Maxim/Dallas
